HX-1500

Compact bezel-free touch screen POS

Hospitality with variety & General Retail

The HX-1500 all in one "Hybrid" POS solution that combines the rock solid reliability and performance of embedded POS terminals with the flexibility of PC based technology, such as Remote Maintenance, with an even more sophisticated appearance with a 10.4" bezel-free and true-flat touch screen.

HX-1500 Features, suitable for Hospitality and Retail

Hospitality Features

Phoenix, Hand Held Ordering -
HX-1500 can be linked to Android terminals with "Phoenix", specially developed by Uniwell for hand held ordering.
No dedicated terminals needed; commonly-available Android terminals in the market would serve as hand held ordering terminals for lower initial investment.

Table Management -
Complete table management covering multiple locations and different range of tables per clerk. Table status can be known by color - for example, reserved, seated, ordered, check-out bill issued, paid, cleaning, vacant.

Improved Promotion Control -
A range of multi buy, combos and meal deals can be configured. In addition it is also possible to schedule price changes for "happy hour" style promotions. It is important to be able to configure and run promotions but it is even more important to be able to monitor the impact of the promotion. The HX-1500 provides detailed pricing reports that show the effect of promotions.

General Features

Customer Loyalty -
The HX-1500 can be configured to run a simple low cost loyalty system that will allow you to provide loyalty cards to your customers and provide them with preferential pricing and discounts. The built-in customer database keeps track of what customers are ordering and when they last ordered. With this internal database, it is also possible to manage employees meals at canteens subsidised by the company, for example.

Real-time Stock Control -
Many businesses cannot justify the time and resources to manage a fully featured stock control system. The HX-1500 comes as standard with a real-time stock control system that, with minimal effort, will provide accurate stock control for the key product lines.

Management Information -
A wide range of detailed reports provide managers and owners with the information they need to control and drive the business forward. The HX-1500 can be configured to automatically send sales data (in XML format) to a remote FTP server or Web based reporting service - UniPortal.
